

AI Job Hunter

SUMMARY

AI Job Hunter is an AI-powered job discovery and career optimization platform. The platform aggregates jobs from multiple sources worldwide and uses AI to score opportunities against a user's CV, skills, experience and preferences. The system then assists users throughout the entire hiring lifecycle: Discover jobs, Prioritize jobs, Optimize CVs, Generate cover letters, Prepare for interviews, Track applications, Improve employability. The platform is designed to reduce job search effort from hours per week to minutes per day.
