

AI Job Hunter – Dashboard Specification

Objective

Design and build a modern SaaS dashboard for an AI-powered job search platform called "AI Job Hunter".

The dashboard should NOT behave like a traditional job board.

The purpose of the dashboard is to act as a personal command center that helps users:

- Discover AI-scored jobs
- Prioritize opportunities
- Track applications
- Improve their CV
- Prepare for interviews
- Understand market demand
- Monitor job search progress

The visual style should resemble modern SaaS platforms such as:

- Notion
- Linear
- Monday.com
- Hubspot
- ClickUp
- Stripe Dashboard

Use:

- Clean white background
- Subtle grey borders
- Soft shadows
- Rounded corners
- Minimalist modern styling
- Responsive design
- Mobile-friendly layout

Layout

Left Navigation Sidebar

Logo:

AI Job Hunter

Navigation:

- Dashboard
- Job Discovery
- Saved Jobs
- Applications
- Interview Prep
- CV Optimizer
- Market Insights
- Search Sources
- Alerts
- Settings

Bottom section:

CV Match Score Card

Example:

84%

Last updated 3 days ago

Button:

View CV Analysis

Top Header

Welcome back, [User Name]

Buttons:

Upload New CV

Run New Search

Top right:

Notifications icon

User profile dropdown

Dashboard Overview Cards

Display summary metrics:

Card 1

Jobs Found

397

56 new today

Card 2

High Match Jobs

18

Match >85%

Card 3

Saved Jobs

15

7 need attention

Card 4

Applications

22

4 this week

Card 5

Interviews

3

Upcoming

Card 6

Average Match Score

81%

Action Required Panel

Purpose:

Tell the user what to do today.

Example items:

Apply Today

- NATO Security Officer
- Security Architect

CV Needs Updating

- 14 jobs missing CISSP

Interview Prep Ready

- Deloitte Security Manager

New High Match Jobs Found

- 18 new jobs

Each item should be clickable.

Top High Match Jobs

Display:

Top 5 AI-scored jobs

Columns:

Company Logo

Job Title

Company

Location

Match %

Status

Example:

Security Officer NATO Luxembourg 92%

Senior Security Lead Cubic Auckland 89%

Each row clickable.

Opportunity Heat Map

Display jobs by country.

Show:

Country

Jobs Found

Average Match %

Example:

New Zealand 42 jobs 84%

Australia 103 jobs 79%

Singapore 17 jobs 87%

Luxembourg 4 jobs 91%

United States 68 jobs 75%

Visual:

World map with highlighted countries.

Skills Intelligence Panel

Purpose:

Aggregate data across ALL jobs.

Two sections:

Most Requested Skills

- Azure
- AWS
- CISSP
- GRC
- AI Security

Most Commonly Missing Skills

- CISSP
- CISM
- Healthcare Security
- DevSecOps

Display as ranked bars.

Application Pipeline

Use a Kanban-style board.

Columns:

Saved

Applied

Recruiter Contacted

Interviewing

Offer

Rejected

Each card should display:

Job Title

Company

Match %

Date Added

Allow drag and drop.

Interview Prep Ready

Display jobs with generated interview packs.

Example:

NATO Security Officer

Status: Ready

Cubic Security Lead

Status: Ready

ASB Security Specialist

Status: Preparing

Button:

Launch Interview Prep

AI Recommendations

Generate recommendations based on all discovered jobs.

Examples:

- Add CISSP certification
- Add audit review examples
- Highlight governance achievements
- Add measurable business outcomes
- Expand executive reporting experience

Recommendations should be generated dynamically.

Search Coverage

Display sources searched.

Examples:

LinkedIn 142 jobs

Seek 73 jobs

Indeed 88 jobs

Government Jobs 19 jobs

RSS Feeds 31 jobs

Company Sites 44 jobs

Display:

Total Jobs Analysed

397

Display search freshness timestamp.

Recent Alerts

Display notifications:

New 92% Match Found

CISSP appears in 38% of high-match jobs

Interview in 2 days

Etc.

Design Requirements

Use modern React components.

Technology:

- React
- TypeScript
- TailwindCSS
- shadcn/ui
- Recharts for graphs
- Lucide Icons

Requirements:

- Fully responsive
- Mobile friendly
- Fast loading
- Dark mode ready
- Accessible
- Professional SaaS appearance

The dashboard should feel like a premium subscription product that users enjoy opening every day.

The dashboard must focus on answering:

1. What should I do today?
2. What are my best opportunities?
3. How is my job search progressing?
4. What skills am I missing?
5. Where should I focus next?
